Fortem Ozone Sauna

Another first in Turkey from the manufacturer of Salutem, which is the number one in Turkey in the production of Medical Ozone Devices...

The combination of Far-infrared technology, water vapor and ozone was produced in the expected "Fortem Ozone Sauna", which was collected in a single device.

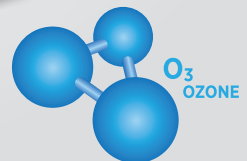

Thanks to the powerful ozone generator in "Fortem Ozone Sauna", it can produce up to 50 ug/mL ozone gradually using oxygen cylinder and oxygen concentrator as well as the ability to use ambient oxygen.

Ozone gas is heavy gas and collapsed on ambient floor" Fortem Ozone Sauna" 6 ozone dislocations are designed in the cabin. In this way, you can use the ozone is effectively populated throughout the body.

Features;

- Special portable cabin resistant to heat and ozone,
- Touch and wide screen,
- Microprocessor controlled temperature and time adjustment,
- Wireless emergency button,
- Easy to use interface,
- The ability to take doses up to 50 ug / mL gradually,
- Far infrared technology,
- Steam sauna technology,
- Far infrared and steam sauna technologies can be used separately or simultaneously,
- Aroma therapy feature,
- The ability to drain the wastewater accumulated in the sauna cabin through the motorized vacuum pump,
- 6 ozone outputs,
- To be able to use ambient oxygen,
- Ability to use oxygen cylinder or oxygen concentrator.
