Take Care of your Feet!

TDO Therapy has created the notion of diabetic foot wear in Turkey and it manufactures completely hand made foot wear made of 100% leather via advanced technological materials. **TDO Therapy** foot wear those are antibacterial, light, air permeable and heat balanced having anti-shock foot-bed, leather foundation without interior stitches, are prepared specially based on scientific data. **TDO Therapy** footwear make your feet light and relaxed during the day with easy-wearing, flexible calf skin and special foam. They are adaptable to special underlays.

Hand Made

Anti-Shock Sole

Millions of people in our country and on the World complain and suffer from feet problems affiliated with diabetes. Neuropathy, that is known as nerve fibre damage, affects almost 1 of three diabetics. If you are diabetic, burning, stinging, tingling at feet, electrical shock and similar complaints may be foreshadow of diabetic neuropathy. Researches indicate that specially designed and manu-

factured footwear protects diabetics having diabetes neuropathy (nerve damage resulting in numbing or pain) against foot wounds, heating and infection. Relaxing diabetic feet and finding solutions for the problems is our work. Please contact us for anatomic and orthopaedic models suitable for your feet. **Health for your feet!**

It is determined that feet are protected in 50% of people using therapeutical foot wear having protective and treating features. Therapeutical footwear protect feet against risk of neuropathy; circulation disorders, heat differences, callus and ingrown toenails, edema and skin lesions.
