LIFE SUPPORT | 91- 96

ABOUT US

A Small and Also A Global Scale Supplier

In 2001, Morsa Cyberg Orthopedics started its production activities of the Soft Orthopedic in Turkey, with years of production experience to many countries worldwide offers a high-quality range of product

Buca Organized Industrial Zone

Morsa Cyberg Orthopedics, which is the pioneer of the firsts in its field, has gained a significant place in the market that it caters today with its quality and customer satisfaction and presents to its consumers nearly 200 product types under the name of Morsa Cyberg brand, which is one of the first brands that come to mind in the medical orthopedic industry. We can count our first products that come to mind such as; corsets, knee supports, cervical supports, wrist and ankle supports, foot health products, as well as other orthosis and splints.

We think that the most valuable thing in life is health, we continue to work with the same consciousness from the first stage in our design and production process to the last step. Our goal is to sustainably grow in the global medical market with high-quality innovative products and high customer satisfaction by putting healthy and functional solutions on top of everything.

Review our inventory on our products page and contact us if you can't find what you're looking for.

REF-12.103

CERVICAL ORTHOSIS (SPONGE)

- It relieves the painful conditions of the neck and by restricting the cervical spine movement to some angles.
- It can be applied in neck hernias (cervical disc hernia), cervical osteoarthritis and cervical muscle pain.

REF-12.104

CERVICAL ORTHOSIS (PHILADELPHIA TYPE)

- It provides full restriction in neck movements after neck traumas and cervical disc herniation.
- It provides stabilization in cervical spine fractures and is used to reduce pain in cervical spine-muscle strains.
- It supports a weak or injured neck and helps relieve pain.

SIZE CHART

	S	34 - 36 cm	C O L O R	
	M	36 - 38 cm		
	L	38 - 40 cm		

REF-12.108

CERVICAL ORTHOSIS (TRACHEOSTOMY OPEN)

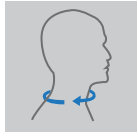

- It provides full restriction in neck movements after neck traumas and cervical disc herniation.
- It provides stabilization in cervical spine fractures and is used to reduce pain in cervical spine-muscle strains.
- It supports a weak or injured neck and helps relieve pain

SIZE CHART
