

# OctaCare

## Surgical Tapes

### OctaCare Cotton

Constructed from plain cotton fabric with an adhesive containing zinc oxide which is added to provide long-term adhesion and to help prevent infection. Used for many different applications such as securing bulky dressings, tubing and small splints, fastening tubing and devices such as catheters and IV tubing, stabilization of finger splints. Non-irritating adhesive for easy removal, making it a great for post-surgery applications and frequent gauze changes.

- Strong adhesion that is gentle to the skin
- Easy tear by hand in width and lengthwise
- Durable and conformable
- Low irritation
- X-ray Permeable
- Allows for moisture evaporation and skin to breathe
- Leaving no adhesive residue upon removal

## OctaCare I.V. Fixation Dressing-NW & PU

Non-woven I.V. Dressings consist of soft non-woven fabric which increases patient comfort. Available with highly absorbent and non-adherent pad allowing faster wound healing. PU dressings minimize dressing changes hence prevents skin irritation and provides more patient comfort. The film ensures excellent fixation of the cannula so that the patient can move freely with the cannula fixed. Transparent film enables regular inspection of the cannula insertion site for signs of infection without having to remove the dressing. Highly stretchable film facilitates easy and painless removal of the dressing after the use.

- ◆ Hypoallergenic
- ◆ Easy opening, simple removal
- ◆ The highly absorbent wound pad can expand up to seven times its thickness when it comes in contact with fluid
- ◆ Sterile and individually packed
